

Honda GL1800 Bluetooth Aux

This sheet must be read completely to:

1. Provide assistance/clarification to the installer, customer, end user or others.
2. Avoid causing injury or death to installer, customer, end user, or others.
3. Prevent damage to vehicle and/or accessory or other.

HEY YOU! Please, please, please read the instructions completely prior to installation. 90% of questions we receive could be answered simply by reading ALL the instructions before installing anything. If you have any question or problem during the installation, please contact us as necessary. Phone support will always provide the quickest response. Installation of this product implies your agreement with our sales, warranty, exchange and return policies found on our website.

You can thank the lawyers for this next bit of fun. With that said, lets go!

Installer: Pretty please, give this sheet to the customer after reading it.

It is virtually impossible for us to be able to address every possible situation an installer or user will encounter. This requires both to exercise due dilligence and to apply some level of common sense. AKA...no 'hold my beer and watch this' type stuff.

Important Information in our instructions will be provided in the following manner:

SHOP TIP: literally great info we have gathered from hands-on installs or customer feedback.

NOTE: important information regarding the installation. Pay attention.

CAUTION: failure to follow instructions could result in damage to vehicle and/or accessory. Really pay attention.

WARNING: failure to follow instructions could result in injury/death of operator and/or passenger/others. For Pete's sake, PAY ATTENTION!

NOTE:

1. "Left", "Right", "Front" and "Rear" are described from the seated position of the vehicle. Vroom vroom.
2. Check local laws regarding the use of auxiliary lighting and electronics. Don't be 'that guy'.
3. Use of owners manual or service manual is recommended for installation. Sorry...more reading.
4. If so equipped, place motorcycle on it's centerstand on solid, level ground or engage parking brake. Do it like Mom is watching.

CAUTION:

1. When adding electrical accessories, always disconnect the battery and properly fuse new electronics.
2. DO NOT let the smoke out of the part. All electronics operate on smoke....when released, electronics are dead.

WARNING:

1. Allow the vehicle to cool prior to installation & when operating engine, allow adequate ventillation. Yep.
2. NEVER modify the kit in ANY manner. Doing so voids warranty and places all liability on the installer and/or user. Nope.
3. Never route wires or install components that interfere with the operation of the steering, suspension, brake/clutch/gas lever/pedal/grip or any other operational function of the vehicle. Duh.
4. Never allow your accessories to cause distractions to remove your focus off the vehicles operation. Never forget that this is a high risk sport - don't make it a higher risk when you don't have to. Major duh.
5. Never allow your accessories to cause distractions to others on the road. Super sized duh.

Part Listing

- 1 bluetooth module.

Tools / Supplies Required

pointed pick or small screwdriver.

1. Remove left fairing pocket.

Open the pocket door.

Remove the 4 push pin fasteners by pressing down in the center of the pin.

Once depressed, pull up and remove the fastener.

Remove the pocket from the bike.

2. Install the module.

Power connections. Locate the rubber boot in the upper left corner of the hole created by removing the pocket. If you have a power plug connected to the bike currently, follow the wires to the connectors and unplug it. Now plug the power connector T harness inbetween the 2 connectors you just unplugged. If you do not have a power plug, locate the red 3 pin connector inside the rubber boot and plug the white 3 pin matching connector from the module into the bike.

Audio connection. If you have the OEM aux cord plugged into the white 3 pin connector, remove it. Plug the matching connector from your module into the bike.

3. Pair the module.

Turn the bike on.

Select "AUX" as your audio source on the stereo.

Place your bluetooth audio device into pairing mode.

Look for 'ELECTRICAL CONNECTION' on your Bluetooth list.

Pair the device. If your device asks if you would like to allow the module access to your contacts and such, tell it no.

Test for audio.

4. Reassemble bike.

Place the Bluetooth unit up out of the way of the pocket.

Reinstall the pocket into the bike.

To reset the push pin, hold the body while you push the pointed tip upward.

Insert pin into hole.

Push pin down until it is flush with the body of the push pin.
